DEFENSE

DIAMOND DEFENSE

BALLISTIC ASSAULT BARRIER SYSTEM™

Advanced protection.

Proven performance. Greater efficiency.

The Diamond Defense Ballistic Assault Barrier System™ delivers superior protection against ballistic threats and forced entry while maintaining optical clarity and architectural appeal. Engineered for performance. Built for confidence.

BALLISTIC & FORCED-ENTRY PROTECTION

Engineered to stop threats and delay entry.

OPTICAL CLARITY & AESTHETICS

Maintains the look of your existing windows.

ENERGY EFFICIENT SOLUTION

Reduces cooling costs and improves indoor comfort.

ENERGY PERFORMANCE & THERMAL CONTROL

The B.A.B.S. system rejects solar and infrared energy and blocks UV, helping reduce heat transfer and improve indoor comfort.

REJECTION

*Published technical performance values. Actual building energy savings vary by glazing, climate, exposure and operating conditions.

EXISTING GLASS

Preserves the appearance of the original glass and maintains the building's natural aesthetic.

PROPRIETARY ENERGY MANAGEMENT ZONE™

Engineered separation enables controlled system flexure and impact-energy dispersion while adding thermal resistance to help reduce heat transfer.

BABS PCX™ POLYCARBONATE HYBRID

Optically clear polycarbonate hybrid featuring a scratch-resistant hardcoat and engineered flexibility that helps absorb and dissipate ballistic impact energy.

BLAST RATED STRUCTURAL SEALANT

Permanently bonds the system to the frame, delivering superior structural integrity and impact resistance.

CRITICAL SITUATION

Provides valuable time for occupants to respond and evacuate.

DETER INTRUSION

Delays forced entry and provides valuable time for first responders.

ENGINEERED RESPONSE

Uni-directional design gives first responders the tactical advantage to return fire while remaining protected by the system.
